# COMMISSION ACTION

In a joint meeting with the State Transportation Commission in Lansing, the Michigan Aeronautics Commission met on March 26, 1998. Among items acted upon was approval of \$8.1 million for airport improvements across the state. Some projects have federal, state, and local funding, while others are funded from state and/or local sources alone. Commission approval for federally funded projects authorizes state participation, subject to issuance of a federal grant. Federal and state dollars for airport development are primarily from restricted, user generated funds. The primary sources of revenue are aviation fuel and passenger taxes, as well as aircraft registration fees.

Following are approved projects:

## GRANTS

# AIR SPORTS IN THE OLYMPICS

Judging is complete at the state and national levels of the 1998 International Aviation Art Contest. This year, eleven young Michigan artists have been cited for artistic excellence for their portrayal of this year's theme: "Air Sports in the Olympics." The contest was judged in three separate age categories. Each states' first place winner in each category advanced to the national competition in Washington D.C. We are especially pleased that Jake Chidester of Brighton, the first-place winner in category II, has also won first-place nationally. His entry will now compete internationally later this spring, in London. The contest is sponsored at the state level by the Michigan Department of Transportation, Bureau of Aeronautics and at the national and international levels by the Federal Aviation Administration, National Association of State Aviation Officials, and the Federation Aeronautique Internationale.
